Art Unit: 1724

This application contains claims directed to the following patentably distinct species of the claimed invention:

(1) "placing" species (e.g. dispersing onto a surface, dispersing into a liquid, passing a liquid through a filter, passing a gas through a filter, etc.);

(2) "external action" species (e.g. photochemical, electrochemical, mechanical, thermochemical, sonochemical, direct chemical, etc.); and

(3) "method of use" species (e.g. filtering drinking water, removing chemical pollutants from industrial discharges, removing light fractions of petroleum products from storage reservoirs, removing gaseous condensate from storage reservoirs, neutralizing exhaust gases from internal combustion engines, filtering cigarette smoke, purifying blood plasma, treating skin disease discharge, treating burns, etc.).

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed "placing" species, a single disclosed "external action" species and a single disclosed "method of use" species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 9-11 and 13-19 appear to be generic.

Applicant is advised that a response to this requirement must include an identification of the species that are elected

Art Unit: 1724

consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, Applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, Applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should Applicant traverse on the ground that the species are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to I. Cintins whose telephone number is (703) 308-3840. The examiner can
